

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. LETTER OF TRANSMITTAL

U. S. DEPARTMENT OF AGRICULTURE,
DIVISION OF FOREIGN MARKETS,
Washington, D. C., March 12, 1903.

SIR: I have the honor to transmit herewith the manuscript of a report showing the tariff rates and regulations enforced by the various foreign countries as regards the importation of fruit and nuts, and to recommend its publication as Bulletin No. 36 of this Division.

Very respectfully,

FRANK H. HITCHCOCK,
Chief.

Hon. JAMES WILSON,
Secretary of Agriculture.

FOREIGN IMPORT TARIFFS ON FRUITS AND NUTS, 1903.

INTRODUCTION.

The present bulletin relative to the import tariffs on fruits and nuts is the second in a series of reports the Division of Foreign Markets is preparing to meet the demand for information regarding the duties levied by foreign countries on imported products of agriculture. The first of these reports, which related to the import tariffs on meat and meat products, was issued as Bulletin No. 35 of the Division. A third report, dealing with the tariffs levied on grain and grain products, is also ready for publication and will be shortly issued as Bulletin No. 37.

The information presented has been derived wherever practicable from the original tariff laws of the several countries concerned, these laws having been procured in many instances through the courtesy of the United States consular officers. When the original laws could not be obtained recourse has been had to the translations issued by the International Customs Tariff Bureau of Brussels, Belgium, and to the tariff notices appearing in such authoritative publications as the British Board of Trade Journal, "Das Deutsche Handelsarchiv" and "Das Handelsmuseum." As far as possible the rates have been verified by a comparison with the actual amounts of duty collected upon the various articles as reported in the official trade returns of the several countries. Tariffs published originally in other languages have been translated into English, and the various denominations of money, weight, and measure have in all instances been converted into their equivalents in United States denominations.

UNITS OF VALUE AND QUANTITY.

The equivalents in United States money of the various items of value, and in United States denominations of the terms of quantity stated in the tariff schedules of the several countries are given on pages 2 and 3 of this bulletin.

ARRANGEMENT OF TARIFFS.

The report embraces 163 tariffs, including those of the United States and the Philippine Islands, which have been added for purposes of comparison. As arranged in the report, the various nations for which tariff information is presented appear in alphabetical order, but dependencies follow alphabetically the respective countries to which they are subject.

While care has been taken to include all amendments of which information could be obtained up to the date of the report, it is to be borne in mind that tariff schedules are being almost constantly modified to meet changing trade conditions throughout the world, and for this reason the rates here presented are to be accepted as relating only to the dates given.

The several tariffs, so far as they apply to fruits and nuts, are as follows:
